Eight modernized elevators

FREIGHT ELEVATORS
One freight elevator: 8’4”h x 7’6”w x 5’6”d
Two entrances: lobby and loading dock door: 3’6” x 6’10”

SUSTAINABILITY
• LEED Gold certification under LEED v4 Existing Buildings: Operations + Maintenance
• EPA Water Sense-labeled new plumbing fixtures to promote high-performance and water efficiency
• Tenant recycling program and organics collection program for composting
• Use of green cleaning products, equipment and strategies to promote a healthier work environment
• Renewable wind power is purchased to offset 100% of the building’s electricity use
• Green roofs and exclusive outdoor terraces

POWER AND UTILITIES
HEATING, VENTILATION AND AIR CONDITIONING
Heating is provided by Con Edison steam. Heat exchangers convert the steam to hot water, which is supplied to the coils in the central fan rooms and the perimeter induction units. The air conditioning system is a central-fan variable-air-type consisting of one 625-ton steam turbine and one 625-ton electric drive centrifugated. The two central fan rooms are located in the sub-cellar and on the 25th floor. The cooling tower has a capacity of 1,960 tons, of which approximately 350 tons are available for tenant’s supplementary cooling systems. Conditioned air is distributed through perimeter induction units and overhead ductwork for interior spaces. Temperatures for these zones are controlled by thermostats.

ELECTRICAL SYSTEM
Con Ed delivers electrical power to the building via a second contingent, 120/208V spot network located in the sidewalk vault. The service is made up of the two 4,000-amp service take-offs that feed the building’s service switchgear. Power is then distributed via pipe and wire risers throughout the building.

100% of the total energy utilized by the building consists of wind power. The building’s electrical distribution system is continuously maintained in accordance with national testing standards and applicable codes to provide the highest level of reliability. It is equipped with a sophisticated, web-enabled electrical sub-metering system, which is used for tenant billing as well as allowing our in-house experts to monitor system performance in real-time. Our in-house electrical engineers analyze new tenant designs and requirements to ensure that sufficient electrical distribution is provided in accordance with the lease terms and building rules and regulations.

TELECOMMUNICATIONS
The Durst Organization offers its tenant a wide range of telecommunications providers. Service providers which are currently available at 733 Third Avenue:
• Wireless: Verizon Wireless
• Telephone: Verizon
• Internet: Cogent, Crown Castle, Astound Broadband Powered by RCN, Reliance, and Spectrum
• Television: RCN and Spectrum
